

VOLUNTEER

Our programs depend on the service volunteers provide and we know that working with people from the community is an important way to expand our public safety vision.

PATHWAYS INFORMATION & ASSISTANCE

Pathways Volunteer Specialists help victims of DUI related accidents access resources. Our callers will surely appreciate your compassionate listening and reassuring voice when searching for services and information they need.

PUBLIC EVENTS

We participate in brewery, winery, and distillery events all year and volunteers can join our team to help provide a tent/ booth presence and talk with attendees about our programs. It is a fun way to learn and share while working directly with the public to make communities safer.

COLLEGE CAMPUS AMBASSADORS

Our volunteers can make a difference on any campus. This is an opportunity to help your peers engage each other with prevention tools that change high-risk behavior and help create a long lasting public safety program for your school.
